Introduction

Ladies and gentlemen,

we would like to invite you to the XXIX Conference of the Danubian countries. The Conference will focus on hydrological topics and current research needs in the Danubian region.

In response to the current pandemic situation and the associated measures we have decided to organize the conference virtually. Should the situation next year allow it, it would also be possible to attend the conference in person. For more information please visit www.danubeconference.eu .

The Conference of the Danubian Countries will be followed by the Conference of Czech and Slovak hydrologists “Hydrologické dny” (Hydrological Days), held on September 9, 2021. It is possible to attend both conferences. More information can be found at www.hydrologickedny.cz.

Conference topics

- Current state of the art on the hydrological bases of water management at the Danube river
- New developments in hydrological forecasting and enabling hydrological work in the Danube catchment
- Hydrology for better understanding the Danube ecosystem
- Learning about hydrological extremes: then, now & in the future
- Bridging the science policy gap in the Danube catchment: the role of IHP Danube and its partners

For further details see conference website.

Publication

- Extended abstracts proceedings (printed)
- Full papers proceedings (digital)
- Selected papers will be published in the following scientific journals:
Journal of Hydrology and Hydromechanics;
Acta Hydrologica Slovaca; Climate.
